

# Borealis at a glance

Borealis is one of the world's leading providers of advanced and sustainable polyolefin solutions. In Europe, Borealis is also an innovative leader in polyolefins recycling and a major producer of base chemicals. We leverage our polymer expertise and decades of experience to offer value-adding, innovative and circular material solutions for key industries such as consumer products, energy, healthcare, infrastructure and mobility.

In re-inventing essentials for sustainable living, we build on our commitment to safety, our people, innovation and technology, and performance excellence. We are accelerating the transformation to a circular economy of polyolefins and expanding our geographical footprint to better serve our customers around the globe.

Olefin production in Porvoo, Finland

Innovation Headquarters in Linz, Austria

Polyolefin production in Stenungsund, Sweden

Borealis has 6,000 employees

## Owners and Management

### Owners

- OMV: 75%
- Abu Dhabi National Oil Company (ADNOC): 25%

### Executive Board

- CEO: Thomas Gangl
- CFO: Daniel Turnheim
- Polyolefins, Circular Economy Solutions, Innovation & Technology:  
Craig Arnold
- Base Chemicals & Operations:  
Wolfram Krenn
- Joint Ventures & Growth Projects:  
Philippe Roodhooft

## Key Figures

- A global workforce of approximately 6,000
- Customers in 120 countries around the world
- Net Profit: EUR 2.1 billion in 2022

### Borealis AG

Trabrennstr. 6-8 • A-1020 Vienna • Austria  
Tel +43 1 22 400 000 • Fax +43 1 22 400 333  
[www.borealisgroup.com](http://www.borealisgroup.com) | reg no FN 269858 a

## Locations

- Head Office: Vienna, Austria
- Innovation Centers: Linz (Austria), Porvoo (Finland), Stenungsund (Sweden); Borouge: Abu Dhabi (UAE)
- Production sites: Austria, Belgium, Brazil, Finland, Germany, Italy, South Korea, Sweden, The Netherlands, United States
- Recycling Plants: Austria, Belgium, Germany
- Joint Ventures: Borouge - with the Abu Dhabi National Oil Company (ADNOC) in Abu Dhabi, UAE, and Bayport Polymers - with TotalEnergies in Texas, United States

## Media Contact

# Borealis

## business areas

Building on its proprietary Borstar®, Borlink™ and Borceed™ technologies and more than 50 years of experience in polyolefins, Borealis and Borouge support key industries with a wide range of applications in the areas of consumer products, energy, healthcare, infrastructure, and mobility.

Base chemicals complement the portfolio, servicing a wide range of industries in the business-to-business area.

### Polyolefins

Polyolefins are a family of thermoplastics that include polyethylene (PE) and polypropylene (PP). The polyolefins manufactured by Borealis form the basis of many plastics products that are an intrinsic part of our daily lives. The areas of application are wide-ranging and diverse. They are divided into the main segments:

#### **Energy, Infrastructure, Mobility, Consumer Products, Healthcare, Polymer Solutions, Circular Economy Solutions**

Each segment benefits from the advantages offered by Borealis polyolefins: resource-efficient production methods, assured high performance, sustainability and reliability of end products, and improved cost efficiencies.

##### **Energy**

Borealis provides added-value and sustainable polyolefin compounds for the global energy industry, in submarine and land, power transmission and distribution, networking and communication cable installations, energy storage and capacitors based on Borlink™ technologies.

##### **Infrastructure**

Borealis offers advanced and sustainable polyolefin solutions for pipe systems used in various industries: water and gas distribution, waste water and sewage disposal, irrigation, plumbing and heating, and oil and gas.

##### **Mobility**

In vehicles, Borealis continues to discover new material solutions which help facilitate lightweight construction and thus play an important role in enhancing energy efficiency. Borealis' leading-edge polyolefin plastic materials are used in a wide range of exterior, interior and under-the-bonnet applications. These include bumpers, body panels, trims, dashboards, door claddings, climate control and cooling systems, air intake manifolds and battery cases.

##### **Consumer Products**

Borealis provides advanced and circular polyolefin solutions for flexible and rigid packaging, and for hygiene and filtration applications, based on proprietary Borstar® technology.

##### **Healthcare**

Borealis offers advanced polyolefins for medical devices, pharmaceuticals and diagnostic packaging.

##### **Polymer Solutions**

Borealis continually develops performance-enhancing solutions such as polymer modifiers (plastomers and elastomers) for projects with demanding sealing, flexibility, compatibility and processability requirements. Borealis' PP-based foamed products fulfill the varying and sophisticated needs of both converters and consumers.

##### **Circular Economy Solutions**

Borealis recognizes Circular Economy (CE) as imperative across all its industry applications and is dedicated to the entire cascade of circular solutions, including reuse and design for recycling. Borealis also offers solutions produced from (advanced) mechanically recycled feedstock (Borcycle™ M), chemically recycled feedstock (Borcycle™ C) and renewable-based feedstock (Bornewables™).

### Base Chemicals

As the building blocks of the chemical industry, base chemicals are used to manufacture the essential products and applications used by industry and consumers in daily life. Base chemicals are used in diverse sectors, including aviation, mobility, renewable energy, consumer appliances, advanced packaging, healthcare, and many others.
