

Polyolefins and Base Chemicals

Borealis hereby confirms that we have performed all registrations according to the REACH Regulation ((EC) No 1907/2006) and comply with all related REACH obligations. Our REACH registration status can be seen at:

[Product Compliance - Product Stewardship - Commitments - About Borealis - Borealis \(borealisgroup.com\)](#)

Under the section REACH / "Registered Substances" we provide a list of substances, which Borealis has registered, including the registration numbers.

As polymers are exempt from REACH registration, no registration information on individual polyolefin grades can be provided. However, Borealis confirms that all relevant monomers and other ingredients in our polyolefin products are registered by Borealis or its suppliers and are fully REACH compliant if at least one of the two following sentences apply to you:

1. You are supplied with Borealis material that was manufactured/formulated in Borealis' EU production plants.
2. You are situated in an EU or EEA country and are supplied with Borealis material manufactured/formulated in Borealis non-EU production plants and these materials are directly supplied by a Borealis subsidiary.

The above also applies to our recycled product portfolio produced in any of our EU subsidiaries. We have identified the monomers of the polymers we recover from waste within the European Community. Since all of them have been registered within the EU and sufficient safety information is available to us, we are able to make use of the registration exemption as outlined in Article 2(7)(d) of REACH.
