PRODUCT DATA SHEET

Polyethylene

BB2541

High Density Polyethylene for Blow Moulding

Description

BB2541 is a multimodal High Density Polyethylene intended for blow moulding applications. BB2541 exhibits excellent process ability allowing potential for energy savings during goods production. BB2541 is characterised by an outstanding environmental stress cracking resistance together with excellent impact strength combined with good stiffness allowing therefore further container downweighing and waste reduction.

Typical characteristics

BB2541 can be described with following typical characteristics:

Easy process ability Excellent impact strength

Outstanding environmental stress crack resistance Good stiffness

Applications

BB2541 is intended for following applications:

Blow moulding Household and chemical containers such as detergents, cleaners, motor

oils

Bottles and containers up to 10 litres

Physical properties

| Property | Typical value * | Unit | Test method |
|---|-----------------|---------|---------------|
| Density | 954.0 | kg/m³ | ISO 1183-1 |
| Melt flow rate (190 °C/5 kg) | 1.15 | g/10min | ISO 1133-1 |
| Melt flow rate (190 °C/2.16 kg) | 0.30 | g/10min | ISO 1133-1 |
| Melt flow rate (190 °C/21.6 kg) | 32 | g/10min | ISO 1133-1 |
| Flexural modulus (1mm/min) | 1200 | MPa | ISO 178 |
| Hardness, Shore D | 64 | - | ISO 868 |
| Heat deflection temperature B (0.45 MPa) | 75 | °C | ISO 75-2 |
| Tensile modulus | 1100 | MPa | ISO 527-2 |
| Tensile stress at yield (50 mm/min) | 25 | MPa | ISO 527-2 |
| Tensile strain at yield (50 mm/min) | 9 | % | ISO 527-2 |
| Environmental stress crack resistance (Antarox 10 ý152, F50, Bottle test) | 500 | h | ASTM D 1693-A |
| Environmental stress crack resistance (Antarox 10 ýF50, Bell test) | 1000 | h | ASTM D 1693-A |

Data should not be used for specification work

Processing techniques

BB2541 is easy to extrude and can be used in all conventional blow-moulding machines. Following parameters should be used as guidelines:

Polyethylene

BB2541

| Processing setting | Typical value/range |
|--------------------|---------------------|
| Barrel temperature | 170 - 190 °C |
| Die temperature | 175 - 190 °C |
| Melt temperature | 170 - 200 °C |

Packaging and storage

BB2541 should be stored in dry conditions at temperatures below 50°C and protected from UV-light. Improper storage can initiate degradation, which can result in odour generation and colour changes and can have negative effects on the physical properties of this product.

Product compliance documents

Latest versions of product safety information sheets (PSIS), product safety data sheets (SDS) and other product liability documents are available in our website www.borealisgroup.com.

Sustainability aspects

Borealis is ever mindful of the impact of our products on the planet. We promote Design for Circularity (DfC) and Design for Recycling (DfR) to conserve natural resources and to reduce the environmental impact of products over their entire lifetime (including production, use phase and after phase). DfR helps ensure that material can be effectively recycled while maximizing the material performance efficiency. Further information on sustainability and Design for Recycling (DfR) can be found from our websites www.borealisgroup.com and www.borealiseverminds.com.

Disclaimer

The product(s) mentioned herein are not intended to be used for medical, pharmaceutical or healthcare applications and we do not support their use for such applications.

To the best of our knowledge, the information contained herein is accurate and reliable as of the date of publication; however we do not assume any liability whatsoever for the accuracy and completeness of such information.

Borealis makes no warranties which extend beyond the description contained herein. Nothing herein shall constitute any warranty of merchantability or fitness for a particular purpose.

It is the customer's responsibility to inspect and test our products in order to satisfy itself as to the suitability of the products for the customer's particular purpose. The customer is responsible for the appropriate, safe and legal use, processing and handling of our products.

No liability can be accepted in respect of the use of any Borealis product in conjunction with any other products and/or materials. The information contained herein relates exclusively to our products when not used in conjunction with any other material unless as specifically provided for in the test methods stated above.
