

Polypropylene

BJ380MO

Polypropylene Block Copolymer

Description

BJ380MO is a very high melt flow heterophasic copolymer with high/medium impact strength and stiffness, which contains nucleating and antistatic additives and is designed for high-speed injection moulding.

BJ380MO is a CR (controlled rheology) grade with narrow molecular weight distribution giving low warpage.

Components moulded with this grade have good demoulding properties and combine good stiffness, gloss, and antistatic properties with good low-temperature impact strength.

Cas No. 9010-79-1

Typical characteristics

BJ380MO can be described with following typical characteristics:

High impact strength	Good gloss
High stiffness	Excellent antistatic properties

Applications

BJ380MO is intended for following applications:

Houseware containers	Thin wall containers
Lids	Injection-moulded non-food applications

Physical properties

Property	Typical value *	Unit	Test method
Density	905	kg/m ³	ISO 1183-1
Melt flow rate (230 °C/2.16 kg)	80	g/10min	ISO 1133-1
Flexural modulus	1200	MPa	ISO 178
Tensile modulus (1 mm/min)	1300	MPa	ISO 527-2
Tensile stress at yield (50 mm/min)	25	MPa	ISO 527-2
Tensile strain at yield (50 mm/min)	5	%	ISO 527-2
Charpy impact strength, notched (23 °C)	5	kJ/m ²	ISO 179-1/1eA
Charpy impact strength, notched (-20 °C)	3.5	kJ/m ²	ISO 179-1/1eA
Heat deflection temperature B (0.45 MPa)	90	°C	ISO 75-2

* Data should not be used for specification work

Processing techniques

BJ380MO is easy to process with standard injection moulding machines.

Processing setting	Typical value/range
Melt temperature	210 - 260 °C
Holding pressure ¹	200 - 500 bar
Mould temperature	20 - 50 °C
Injection speed	As high as possible

Polypropylene

BJ380MO

¹ Minimum to avoid sink marks.

Shrinkage 1 - 2 %, depending on wall thickness and moulding parameters

Packaging and storage

BJ380MO should be stored in dry conditions at temperatures below 50°C and protected from UV-light. Improper storage can initiate degradation, which can result in odour generation and colour changes and can have negative effects on the physical properties of this product.

Product compliance documents

Latest versions of product safety information sheets (PSIS), product safety data sheets (SDS) and other product liability documents are available in our website www.borealisgroup.com.

Sustainability aspects

Borealis is ever mindful of the impact of our products on the planet. We promote Design for Circularity (DfC) and Design for Recycling (DfR) to conserve natural resources and to reduce the environmental impact of products over their entire lifetime (including production, use phase and after phase). DfR helps ensure that material can be effectively recycled while maximizing the material performance efficiency. Further information on sustainability and Design for Recycling (DfR) can be found from our websites www.borealisgroup.com and www.borealiseverminds.com.
