Recommended use of the chemical and restrictions on use					
Recommended use	:	Raw material for plastics industry			
Restrictions on use	:	Use only according to our recommendations.			

SECTION 2. HAZARDS IDENTIFICATION

GHS classification in accordance with the OSHA Hazard Communication Standard (29 CFR 1910.1200)				
Reproductive toxicity	:	Category 1B		
Specific target organ toxicity - repeated exposure	:	Category 1 (Immune system)		
GHS label elements Hazard pictograms	:			
Signal word	:	Danger		
Hazard statements	:	H360D May damage the unborn child. H372 Causes damage to organs (Immune system) through prolonged or repeated exposure.		
Precautionary statements	:	 Prevention: P201 Obtain special instructions before use. P202 Do not handle until all safety precautions have been read and understood. P260 Do not breathe dust. P264 Wash skin thoroughly after handling. P270 Do not eat, drink or smoke when using this product.

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

Substance / Mixture	:	Mixture
Chemical nature	:	The product is a polyethylene copolymer.
		It contains carbon black.
		It contains stabilisers.

Components

Chemical name	CAS-No.	Concentration (% w/w)
carbon black	1333-86-4	>= 30 - < 50
Phenol, 4-methyl-, reaction products with dicyclopentadiene and isobutylene	68610-51-5	>= 1 - < 2.5
dioctyltin dilaurate	3648-18-8	>= 1 - < 2.5

Actual concentration is withheld as a trade secret

SECTION 4. FIRST AID MEASURES

If inhaled	 Move to fresh air in case of accidental inhalation of vapours or decomposition products. Seek medical advice immediately.
In case of skin contact	 If molten material comes in contact with the skin, cool with plenty of water. DO NOT remove solidified product, as removal could result in severe tissue damage. Obtain medical attention. Wash off with soap and plenty of water. Call a physician if irritation develops or persists.
In case of eye contact	: Rinse thoroughly with plenty of water, also under the eyelids. Get medical attention if irritation develops and persists.

SECTION 5. FIREFIGHTING MEASURES

Suitable extinguishing media Unsuitable extinguishing media	:	Water in spread jet, dry chemicals, foam or carbon dioxide. High volume water jet
Specific hazards during firefighting	:	Principal toxicant in the smoke is carbon monoxide.
		Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.
Special protective equipment for firefighters	:	Wear self-contained breathing apparatus and protective suit.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures	:	Use personal protective equipment. Ensure adequate ventilation.
Environmental precautions	:	It is recommended to implement systems and practices (such as Operation Clean Sweep®) to prevent accidental release of plastics in to the environment. Should not be released into the environment.
Methods and materials for containment and cleaning up	:	Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Non-sparking tools should be used. Vacuum or sweep up spill. All spill of material must be removed immediately to prevent

Engineering measures

Provide adequate ventilation.

Local exhaust ventilation may be necessary.

It is recommended that all dust control equipment such as local exhaust ventilation and material transport systems involved in handling of this product contain explosion relief vents or an explosion suppression system or an oxygen deficient environment.

Personal protective equipment

Respiratory protection	•	In case of dust development use dust mask.
Respiratory protection	•	•
		In the case of vapour formation use a respirator with an
		approved filter.
		When workers are facing concentrations above the exposure
		limit they must use appropriate certified respirators.
		The filter class for the respirator must be suitable for the
		maximum expected contaminant concentration
		(gas/vapour/aerosol/particulates) that may arise when
		handling the product. If this concentration is exceeded, self-
		contained breathing apparatus must be used.
Hand protection

SECTION 10. STABILITY AND REACTIVITY

Reactivity Chemical stability	:	Stable under recommended storage conditions. The product is a stable thermoplastic, with no chemical reactivity. The intended crosslinking reaction occurs in combination with the base resin and moisture: at ambient conditions, in sauna or hot water bath.
Possibility of hazardous reactions	:	In contact with water or moisture methanol will be released.
Conditions to avoid	:	Exposure to moisture Extremes of temperature and direct sunlight.
Incompatible materials	:	None known.
Hazardous decomposition	:	Under fire conditions:
products		Carbon monoxide
		During processing and thermal treatment of the product, small amounts of volatile hydrocarbons may be released. During crosslinking reaction in combination with base resin: methanol

Disposal methods Waste from residues : This substance, when discarded or disposed of is not specifically listed as a hazardous waste in Federal regulations. However, it could be hazardous if it is considered toxic, corrosive, ignitable or reactive according to Federal definitions (40 CFR 261). Additionally, it could be designated as hazardous waste if it is mixed with or comes in contact with a hazardous waste. If such contact or mixing may have occurred, check 40 CFR 261 to determine whether it is a hazardous waste.

Contaminated packagingThe transportation, storage, treatment and disposal of this
waste material must be conducted in accord-ance with all
applicable Federal, state and local regulations.Contaminated packaging: Dispose of as unused product.
Empty containers should be taken to an approved waste
handling site for recycling or disposal.
