Suitable extinguishing media	: Dry powder, carbon dioxide, foam and water mist.
Unsuitable extinguishing media	: Do NOT use water jet.

5.2 Special hazards arising from the substance or mixture

Specific hazards during firefighting	 Incomplete combustion may produce: Carbon dioxide (CO2), carbon monoxide (CO), dense black smoke. Flash back possible over considerable distance. Vapours may form explosive mixtures with air. Do not allow run-off from fire fighting to enter drains or water courses. Risk of explosion.
--------------------------------------	--

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Keep people away from and upwind of spill/leak. Vapours can cause suffocation by reducing oxygen available for breathing. Use personal protective equipment. Eliminate all ignition sources if safe to do so. Attempt to stop leakage without personal risk.

6.2 Environmental precautions

Prevent further leakage or spillage if safe to do so. Prevent product from entering environment and drains. Observe the risk of explosion. If major spillage occurs, contact the proper local authorities.

6.3 Methods and material for containment and cleaning up

Allow to evaporate. Ensure adequate ventilation, especially in confined areas.

6.4 Reference to other sections

For disposal considerations see section 13., For personal protection see section 8.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Advice on safe handling	 Refill and handle product only in closed system. Prevent leaks by checking valves, pipelines and joints regularly. Avoid and prevent all spillage, contact and exposure.
	Ensure adequate ventilation.
Advice on protection against fire and explosion	: Keep away from sources of ignition - No smoking. Take precautionary measures against static discharges. To avoid ignition of vapours by static electricity discharge, all metal parts of the equipment must be grounded. Ensure adequate ventilation. High risk of fire in case of leakage.

7.2 Conditions for safe storage, including any incompatibilities

Requirements for storage areas and containers	: Keep containers tightly closed in a cool, well-ventilated place. Keep product and empty container away from heat and sources of ignition. Containers which are opened must be carefully resealed and kept upright to prevent leakage. No smoking.
