

## Polypropylene

# BorPure™ RF777MO

## Polypropylene Random Copolymer

### Description

BorPure RF777MO is a specially modified transparent polypropylene random copolymer based on proprietary Borealis Nucleation Technology (BNT), with an excellent organoleptic performance.

Faster crystallization speed offers benefits towards all parts of the value chain. It is designed for high-speed injection moulding and contains nucleating and demoulding additives. Products originating from this grade have excellent transparency, good balance of stiffness and impact strength at ambient temperature, low blooming and good demoulding properties.

Cas No. 9010-79-1

### Typical characteristics

BorPure RF777MO can be described with following typical characteristics:

Excellent organoleptic properties	Improved gloss and excellent transparency
Good stiffness and impact balance	Low blooming

### Applications

BorPure™ RF777MO is intended for following applications:

Caps and closures for beverage and food	Transparent storage crates and boxes
Caps and closures for non-food applications	Cosmetic packaging
Lids	Houseware
Pails	

### Physical properties

Property	Typical value *	Unit	Test method
Density	905	kg/m <sup>3</sup>	ISO 1183-1
Melt flow rate (230 °C/2.16 kg)	20	g/10min	ISO 1133-1
Charpy impact strength, notched (23 °C)	6	kJ/m <sup>2</sup>	ISO 179-1/1eA
Tensile modulus (1 mm/min)	1100	MPa	ISO 527-2
Tensile strain at yield (50 mm/min)	29	%	ISO 527-2
Tensile strain at yield (50 mm/min)	11	%	ISO 527-2
Heat deflection temperature B (0.45 MPa) <sup>1</sup>	72	°C	ISO 75-2

\* Data should not be used for specification work

<sup>1</sup> Measured on injection moulded specimens acc. to ISO 1873-2 after 96h conditioning time.

### Processing techniques

This product is easy to process with standard injection moulding machines. Following moulding parameters should be used as guidelines:

Processing setting	Typical value/range
Melt temperature	210 - 260 °C
Holding pressure <sup>2</sup>	200 - 500 bar
Mould temperature	30- 40 °C
Injection speed	High

# Polypropylene

## BorPure™ RF777MO

<sup>2</sup> Minimum to avoid sink marks.

Shrinkage 1 - 2 %, depending on wall thickness and moulding parameters.

BorPure is a trademark of the Borealis group.

### Packaging and storage

RF777MO should be stored in dry conditions at temperatures below 50°C and protected from UV-light. Improper storage can initiate degradation, which can result in odour generation and colour changes and can have negative effects on the physical properties of this product.

### Product compliance documents

Latest versions of product safety information sheets (PSIS), product safety data sheets (SDS) and other product liability documents are available in our website [www.borealisgroup.com](http://www.borealisgroup.com).

### Sustainability aspects

Borealis is ever mindful of the impact of our products on the planet. We promote Design for Circularity (DfC) and Design for Recycling (DfR) to conserve natural resources and to reduce the environmental impact of products over their entire lifetime (including production, use phase and after phase). DfR helps ensure that material can be effectively recycled while maximizing the material performance efficiency. Further information on sustainability and Design for Recycling (DfR) can be found from our websites [www.borealisgroup.com](http://www.borealisgroup.com) and [www.borealiseverminds.com](http://www.borealiseverminds.com).
