

## **Description**

**Stamylex 1026F** is an octene based linear low density polyethylene produced in a solution polymerisation process using a Ziegler-Natta catalyst.

**CAS-No.** 26221-73-8

## **Applications**

Stamylex 1026F Demonstrated applications include:

Pallet stretch wrap

Coextruded films for general packaging purposes, but in Form-fill-and-seal films

particular food packaging lamination films

Diaper films

**Special Features** 

Stamylex 1026F is optimised to deliver:

High puncture resistance Excellent sealability, in particular high hot-tack

Very good optical properties

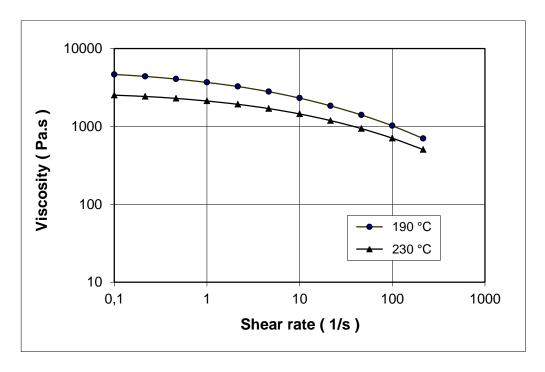

# **Physical Properties**

Property	<b>Typical Value</b> Data should not be used for	Test Method or specification work	
Density (23 °C)	919 kg/m³	ISO 1183	
Melt Flow Rate (190 °C/2,16 kg)	2,2 g/10min	ISO 1133	
Melting temperature (DSC)	123 °C	ISO 11357-3	
Vicat softening temperature (10 N)	101 °C	ISO 306	

Stamylex is a registered trademark of the Borealis group.

# Polyethylene Stamylex 1026F

## **Storage**

**Stamylex 1026F** This polymer, like most polymers, is combustible so the usual precautions concerning ignition sources should be taken in warehouses and storage rooms. Where large quantities are kept in store, it is necessary to observe the normal rules for orderly stock control and it is recommended to use the first in – first out (FIFO) principle for stock planning. The products should be stored in a dry and clean facility to prevent contamination and not be exposed to direct sunlight as this may lead to quality deterioration. These materials have a shelf life of at least 3 (three) years after date of production, provided the material remains in its original unopened packaging and are stored under the storage conditions as described in this document. "Shelf life" means that there will not be any substantial difference compared to the agreed specification. The date of batch creation can be derived from the batch code printed on the bags representing. YYMMDDHHLL (LL being two letters with no reference to the production time). Borealis Plastomers generally does not sell prime material older than 2 (two) years unannounced.

## **Related Documents**

The following related documents are available on request, and represent various aspects on the usability, safety, recovery and disposal of the product.
