
Future-proofing energy distribution

BOREALIS

بروج

Borouge

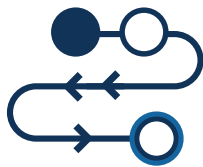

There are many solutions for energy distribution cable insulation and sheathing. But only one offers high resilience and compatibility with increasing electricity demand, while ensuring a low carbon footprint in an economic way.

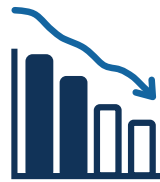

Introducing Visico™ and Borstar®

Our solution combines a Visico™ XLPE insulation with a Borstar® HDPE jacket to create the most durable and versatile solution on the market. And despite the cable being thinner and lighter, the combined solution delivers greater energy efficiency and a superior return on investment over its lifetime.

It's a solution that can:

Increase cable longevity

Reduce operating costs

Future-proof against rising demand

Provide greater resilience against water and heat

Simplify installation

Reduce carbon footprint
