

Polyolefins

On 17 November 2023, new chemicals have been added to the list of chemicals known to the State of California to cause cancer for purposes of Proposition 65. These chemicals are not used or intentionally added during manufacturing of our polyolefin products and therefore not expected to be present. However, the products have not been specifically analysed for the presence of these substances.

- Coal-tar pitch
- Fluoro-edenite fibrous amphibole
- Silicon carbide whiskers

This is to certify that the information on California Proposition 65 contained in our product-specific “Statement on Chemicals, Regulations and Standards” remains valid. Please download the latest statement from our website at <https://www.borealisgroup.com/>.
